amazon FC | FULFILLMENT JOURNEY · PRODUCT REQUIREMENTS

PRODUCT REQUIREMENTS DOCUMENT

Interactive BPMN Website: Amazon Fulfillment Center

A web experience that maps how a package moves through an Amazon Fulfillment Center, from the inbound truck to the outbound carrier. Each step shows the role, its tools, its handoffs, and who is responsible.

Owner **Steve Okyere Oduro-Amoyaw**
Context **Extern Project 308**
Version **v2.0 · Live**
Updated **Oct 3, 2026**
Live fulfillmentcenterjourney.com

---

01 Problem

Fulfillment work is hard to picture from the outside.

PAIN POINT

Text-heavy process docs

Written SOPs and org charts don't show how roles hand work to each other in real time.

PAIN POINT

Feedback lacks context

Worker reviews mention pressure points, like rate, schedule and physical load, but readers can't see where those happen in the flow.

PAIN POINT

Static BPMN is dense

Standard BPMN diagrams are accurate but intimidating for non-specialists and on small screens.

02 Goals & Non-Goals

Goals

- Explain the full FC workflow in under 3 minutes
- Show role, tools, collaborators and RACI for each step
- Make BPMN concepts (events, tasks, gateways) approachable
- Give context for the Extern 308 worker-feedback analysis
- Ship as one lightweight, shareable link

Non-goals

- Real-time or internal Amazon operational data
- User accounts, logins, or saved state
- A full BPMN 2.0 editor
- Representing any specific FC site exactly

03 Target Users

PRIMARY

Extern reviewers

Need a quick, clear view of the FC process behind the analysis.

PRIMARY

Recruiters & hiring managers

Want to see process thinking and build quality in under a minute.

SECONDARY

Students & new associates

Learning how warehouse roles connect.

SECONDARY

Ops & BA learners

Studying BPMN, RACI, and process improvement.

04 Process Scope

BPMN elements represented in the main flow.

▶ Truck Arrives → Truck Delivery → Receiving → Preparation → Stowing → ? Item Valid? →
Picking → Packing → SLAM → ? Weight OK? → Shipping → ■ Package Shipped

Exception path: when a gateway fails, the item goes to the **Problem Solver** (damaged items, missing labels, weight mismatches, orphaned inventory).

05 Functional Requirements

ID	REQUIREMENT	PRIORITY	STATUS
FR-01	Horizontal Flow View with a card for each step: step number, title, role, color stripe, illustration	MUST	DONE
FR-02	Clicking a card opens a detail panel with the description, tools, collaborators and RACI (where defined)	MUST	DONE
FR-03	BPMN start/end events and decision gateways (Item Valid?, Weight OK?)	MUST	DONE
FR-04	Playbar with restart, previous, play/pause, next, progress label and speed toggle	MUST	DONE
FR-05	Story Mode: full-screen guided walkthrough with prev/next and step dots	SHOULD	DONE
FR-06	Animated package token that travels along the flow during playback	SHOULD	DONE
FR-07	Three.js background scene with ambient warehouse particles	COULD	DONE
FR-08	Drag/scroll to pan the flow; scroll hint on first load	SHOULD	DONE
FR-09	Worker-feedback overlay: tag steps with themes (Pay, Schedule & Workload, Management)	COULD	PLANNED

06 Non-Functional Requirements

PERFORMANCE

Single file

One self-contained HTML file (~875 KB) with embedded WebP images and no build step.

RESPONSIVE

Desktop first, mobile friendly

Header collapses below 600px; flow scrolls by touch.

HOSTING

Edge delivered

Cloudflare Workers static assets, HTTPS, custom domain with www.

ACCESSIBILITY

Readable contrast

Light text on dark navy, orange for emphasis only, and keyboard-reachable controls.

COMPLIANCE

Educational use

Not affiliated with Amazon. Public information only; no personal data.

MAINTAINABILITY

Data-driven steps

Steps are defined in one **STEPS** object, so adding a role is a data change.

07 Success Metrics

METRIC	TARGET	HOW MEASURED
Comprehension	Viewer can name 5+ FC roles in order after one walkthrough	Informal test with 5 classmates
Time to understand	Full Story Mode run in under 3 minutes	Timed walkthrough
Engagement	Majority of visitors open at least one detail panel	Cloudflare Web Analytics (to enable)
Reliability	Page loads over HTTPS on root and www	Manual check and Cloudflare status

08 Milestones

PHASE	DELIVERABLE	STATUS
1 · Ideation	Map FC departments and BPMN elements	DONE
2 · Structure	JSON model of steps, roles, connections	DONE
3 · Build	Interactive HTML, Flow View, detail panel, RACI	DONE
4 · Refine	Story Mode, playbar, Three.js scene, illustrations	DONE
5 · Publish	Cloudflare deploy + fulfillmentcenterjourney.com	DONE · OCT 3
6 · Extend	Feedback-theme overlay and analytics	NEXT

09 Risks & Assumptions

- **Accuracy:** Role details come from public sources and may differ across FC sites.
- **Brand:** Amazon naming and colors are used for education only, with a clear non-affiliation note.
- **File size:** Embedded images keep it to one file but make it heavier; split assets if the site grows.
- **Sample limits:** The linked feedback analysis uses 124 Glassdoor reviews and 8 YouTube videos, so read platform differences with care.
